Introduction

Description:

The SCI/D National Program Office (11SCID) supports the field in serving Veterans with spinal cord injuries and disorders with acute inpatient rehabilitation and lifetime continuum of care, from date of injury to end of life. Part of this care (per VHA Directive 1176) includes detailed emergency preparedness and emergency response support.

Description- SCI/D EMERGENCY PREPAREDNESS

The purpose of the SCI/D Emergency Preparedness template is to provide a standardized format for the SCI/D Hubs and Spoke sites to collect Emergency Preparedness information, to ensure that our SCI/D veterans are prepared for an emergency situation, to provide one location for emergency information to be gathered and stored, and to be able to identify the needs of our SCI/D veterans prior to an emergency situation. This template utilizes some existing health factors already implemented in May 2020, in the SCI/D Status Update health factor CPRS template which the field has fully implemented. The more detailed Emergency Preparedness templates provide the added detail needed to provide comprehensive emergency support and evaluate risk, current state, and needs of each Veterans as well as grouped by injury level, geographic area, and other important factors. The purpose of the data is to identify the emergency risks, plans (or lack-thereof), and preparedness for Veterans with SCI/D to support their safety and well-being. This template has been developed in partnership with the SCI/D National Registry & Outcomes Think Tank and our VSSC partners who have programmed and maintain the SCI/D Registry and operational reports.

Description- SCI/D EMERGENCY EVENT

The purpose of the SCI/D Emergency Event template is to provide a standardized format for the SCI/D Hubs and Spoke sites to collect Emergency Event information, to ensure that our SCI/D veterans are prepared for the pending emergency situation, to provide one location for emergency information to be gathered and stored, and to be able to identify the emergent needs of our SCI/D veterans right before or during an emergency situation. The purpose of the data is to identify the emergency risks, plans (or lack-thereof), and preparedness for Veterans with SCI/D to support their safety and well-being. This template has been developed in partnership with the SCI/D National Registry & Outcomes Think Tank and our VSSC partners who have programmed and maintain the SCI/D Registry and operational reports.
